## MyLicense Control

Metered services (also called pay-per-use) is any type of payment structure in which a customer has access to potentially unlimited resources but only pays for what they actually use and are becoming increasingly common in enterprise information technology.

MyLicense Control is a Real-Time internet based solution to control the number of software usages per machine. This application lets the customer decide how many software licenses they want to use and will overcome unwanted / uncontrolled overage.

### Features:

- Affordable pricing
- Windows installer
- Works as a shield
- Real Time counting and reporting thru internet connection
- Records start/stop for each software per machine
- Hourly bucket or not
- Controlled overage possible by admin
- Extension based
- All Windows® versions
- Shortcut creation with arguments
- Updates
- Configuration possible
- Usage reports thru web interface ( on smartphone, pc or tablet)
- In use and release information
- Download usage report
- Updates

Max License : 6  
Current in release mode : 1  
Current in use : 3  
In use by computer : XXXX started at 2015-06-30 13:57:55  
In use by computer : YYYY started at 2015-06-30 14:13:40

AECOSim license valid until 2016-06-01  
Max License : 6  
Current in release mode : 0  
Current in use : 0

3 in use, 1 will be released the next calendar hour.

## Windows explorer ® compatible:

The image shows a Windows Explorer window with a file named 'beton.dgn' selected. A black arrow points to this file. To the right, the 'MyLicense Manager' dialog box is open, showing the file path 'C:\Data\Licensedemo\beton.dgn'. The dialog prompts the user to 'Choose the application that you want to use' and lists two options: 'MicroStation V8i ss3 Bentley View' and 'MicroStation Powerdraft v8i ss3'. The first option is highlighted with a red box.

Double click on file in Windows® Explorer, if more than 1 software that supports dgn is installed choose the software you want to launch.  
You can link \*.dgn on Bentley® software and \*.dwg to AutoDesk® software.

## Shortcut:

Shortcut for silent startup, checks first, if license available → starts software.
